

据《2021年世界粮食安全和营养状况》显示,2020年全球大约十分之一的人口(8.11亿人)面临食物不足的困境,并且这一数字还在持续增加。与此同时,从农田到餐桌的供应链条上,每个环节都存在着粮食的损失与浪费:全球在收获后到零售前环节内损失的粮食约占总产量的14%,在零售、餐饮及消费环节被白白浪费的食物占比达17%,每年导致4000亿美元损失,总量相当于12.6亿人一年的口粮,这不仅意味着食物本身的浪费,更意味着生产这些食物所投入资源的无效消耗。2015年,联合国提出可持续发展目标框架(SDGs),17个具体目标中有多个与食物密切相关,众多国际组织、企业及个人已经开始采取行动,围绕建立可持续的城市与社区、应对气候变化及生物多样性丧失的挑战,重新思考我们与农业、食品行业的关系,探寻人与社会及自然的创新关系。

食物塑造着我们的世界,此次展览共展出 15 组关于食物的研究和设想,艺术家和设计师们以食物为主题进行创作,研究、反思了与饮食有关的多个议题,包括农业承载的传统文化与现代社会的关系、工业化食品的生产和流通模式、食物生产对环节的正负面影响、城市中的消费习惯所形成的社会关系等。当下的我们正处在世界发展的多重矛盾之中,我们希望通过艺术家与设计师的创作视角,激发公众对这些重要问题的关注与讨论:食物如何塑造着我们的世界?明天,我们的的食物会是什么?它们会长成什么样子?会更好吃吗?怎么吃,才能为我们带来更美味的饮食享受,以及更可持续、更美好的未来世界呢?

According to the United Nation's (UN) 2021 "State of Food Security and Nutrition in the World" report, up to 811 million people-around one tenth of the global population - were undernourished in 2020. This is an ongoing issue, yet food loss and waste occur at every stage of the food supply chain. Recent estimates have placed post-harvest waste at around 14% of global production, while at the consumer level, 17% of all available food is wasted. Food waste causes around 400 billion USD of loss per year, which is equivalent to the annual food budget of 1.26 billion people. This means not only the waste of food itself, but also the ineffective consumption of the resources invested in the production of these foods. Starting in 2015, the UN has adopted 17 sustainable development goals (SDGs), many of which are related to food. International organizations, companies, and individuals have begun to take action to establish sustainable cities and communities that are resistant to the effects of climate change and biodiversity loss. Reconsidering our relationship with agriculture and the food industry can help develop better connections between humans, society, and nature.

Food shapes our world. The exhibition "Cherishing Food" shows projects and research by 15 artists and designers, exploring various food-related topics. From the agricultural foundations of traditional society to modern society's attitudes to farming; from the production and circulation patterns of industrialized food, to the positive and negative impacts of food production and the social relations formed by consumption habits in the city. We hope the creative perspectives of artists and designers will stimulate discussion and help consider ways in which food can positively shape our developing world, despite the many challenges of our time. What will our food look like in the future? Will it taste better? Can it bring us a more sustainable and better world?
